

ABHISHEK KUMAR

Data Science | Backend Engineer & Machine Learning Enthusiast

+91 7499241436 | abhishekkumar62437@gmail.com | LinkedIn | GitHub | Mathura, Uttar Pradesh

PROFESSIONAL SUMMARY

Motivated Software Engineering student at IIT Madras with a strong foundation in Python, Data Structures, OOP, and DBMS. Experienced in building Python applications, interactive tools, and contributing to open-source projects through GitHub collaboration. Passionate about writing clean, efficient code and solving real-world software engineering problems.

EDUCATION

Indian Institute of Technology, Madras

Bachelor of Science, Data Science and Applications
(Ongoing in Diploma Phase)

Chennai, India

Jan 2025 - July 2028

Indira Gandhi National Open University

Bachelor of Arts, Public Administration Honours

India

July 2021 - May 2025

SKILLS

Language: C, Python, JavaScript

Database Management: MySQL, MongoDB

Core CS Concepts: OOP, DBMS

Frameworks & Libraries: NumPy, Pandas, Streamlit, Matplotlib

Tools: VS Code, Git, GitHub, Jupyter Notebook

Currently Learning: DSA, Supervised ML, Scikit-learn

OPEN SOURCE EXPERIENCE

Ray | Documentation Contributor

January 2026 - Feb 2026

- Contributed documentation improvements related to job-level checkpointing in Ray Data.
- Worked with project maintainers by addressing review feedback and refining documentation.
- Collaborated with project maintainers through GitHub pull requests, code reviews, and documentation updates.

VATSIM UK | Open Source Contributor

January 2026

- Contributed an AIRAC data update by correcting runway headings for EGHE (Scilly Isles Airport).
- Ensured airport data matched official aviation publications (AIP).
- Successfully collaborated through GitHub issues, pull requests, and maintainer review.

PROJECTS

Smart File Manager | Python, pathlib, shutil, hashlib, watchdog

- Developed a modular Python CLI application to automatically organize files by type, create destination folders, and support configurable behavior through a JSON-based configuration system.
- Implemented duplicate file detection using SHA-256 hashing and real-time folder monitoring with the Watchdog library to automatically organize newly added files.
- Designed a maintainable architecture with activity logging, execution statistics, and modular components, improving code readability, scalability, and reliability.

Interactive Data Dashboard | Streamlit, Pandas, Plotly | [Link](#)

- Built an interactive dashboard for CSV data exploration and visualization.
- Enabled dynamic chart generation, dataset preview, and user-driven column selection.
- Implemented file upload validation and interactive analytics using Streamlit.

ACHIEVEMENTS & COMPETITIONS

Margazhi Cyber CTF — IIT Madras | Finalist, Rank 19 | 2026

- Cleared the 24-hour Round 1 hacking challenge and qualified for the 24-hour Round 2 CTF.
- Scored 700/820 points (~85.4%), securing 19th position among the finalists.
- Recognized as a Finalist in the IIT Madras Margazhi Cyber CTF.
